SL Corporation Announces Latest Release of TIBCO Enterprise RTView™ Powerful New Monitoring Capabilities for TIBCO Enterprise Message Service™ Unveiled

Corte Madera, CA – October 12, 2005 – SL Corporation, the world leader in business information delivery platform technology, today announced the release of Enterprise RTView for TIBCO 3.0e.1, the latest version of SL's powerful solution for monitoring, managing, and increasing visibility into TIBCO infrastructure. The solution is also resold and supported by TIBCO as **TIBCO Enterprise RTView**.

TIBCO Enterprise RTView is a powerful, configurable real-time monitoring and display solution that is tightly integrated with TIBCO middleware. With TIBCO Enterprise RTView, enterprises can create role-based displays to improve real-time visibility into their TIBCO Enterprise Message Service™ (EMS), Hawk™, and Rendezvous™ solutions and improve their response to emerging conditions.

The latest release of TIBCO Enterprise RTView, 3.0e.1, features extensive enhancements to its TIBCO EMS management and monitoring applications. It enables users to easily browse EMS messages and message content in queues. It eases display building by providing an EMS administration data source so that metrics from each server can be used as direct data attachments to build up customized screens for displaying server status. The EMS Manager application can now be deployed in web environments, including a broad variety of portals. In addition, this release includes enhancements to the solutions for Hawk and Rendezvous monitoring.

"SL continues to have a highly productive working relationship with TIBCO and our rapidly expanding base of TIBCO Enterprise RTView customers," said Thomas Lubinski, President and CEO of SL Corporation. "Both have been instrumental in helping us shape the development of our solution. Many of the new features in this release are based directly on input and feedback from TIBCO and our customers."

SL Corporation is an exhibit sponsor at TIBCO's annual user conference, TUCON 2005, which will be held in Orlando, Florida on October 23-25, 2005.

About SL Corporation:

Since 1983, SL Corporation has provided an open business information delivery platform empowering decision makers with mission critical information. Companies leverage the SL platform to deliver powerful real-time business intelligence, infrastructure/application monitoring, and graphic design and application development functionality to their users. SL has issued more than 70,000 licenses for our platform in every vertical industry, including manufacturing, energy/utilities financial services, telecommunications, defense/aerospace, technology, and transportation. SL Corporation can be reached at (415) 927-8400 or on the web at www.sl.com.
