CORTE MADERA, Calif. -- SL Corporation[R], a leading provider of real-time monitoring, analytics, and visualization software, today announced that its flagship product, [Enterprise RTView](#), was named one of manufacturing's Top 50 Technologies for 2008 by START-IT magazine. START-IT's "Top 50 Technologies" award honors products that target the manufacturing industry and help

companies to improve their business practices. Winning products were gauged on their uniqueness and functionality in the market.

"The products selected as winners in the first Top 50 Technologies possess unique capabilities and characteristics in today's marketplace. While considering hundreds of applicants, the editors of START-IT chose products that fit the needs of the manufacturing community," said Peggy Smedley, editorial director of START-IT. "These companies are providing manufacturers with innovative and emerging technologies that enhance revenue opportunities and improve business practices."

Enterprise RTView was chosen because it makes it both possible and practical for manufacturers to deliver meaningful real-time operational visibility solutions quickly, often in less than two months. It offers users the ability to easily create and deploy highly customizable dashboards, analytics, alerts, and reports based on both real-time and historical data from virtually any [data source](#) - all with minimal impact on architecture design and performance. With Enterprise RTView, manufacturers can highlight and address anomalies in the supply chain and other processes before they become costly problems.
