

# **TIBCO RTView BusinessWorks Monitor System**

#### BENEFITS

FASTER TROUBLESHOOTING Dramatically speeds the correlation of crucial troubleshooting data for ActiveMatrix BusinessWorks users.

#### ENHANCED VISIBILITY

Compares real-time performance information across multiple ActiveMatrix BusinessWorks environments and versions within a single view.

HISTORICAL CONTEXT

Helps you leverage historical information to provide a centralized view of ActiveMatrix BusinessWorks metrics over specific time intervals.

#### TRACEABILITY

Enables navigation through the data to assess the history behind the metrics associated with a problem.

#### **CUSTOM VIEWS**

Lets you create custom monitoring displays (optional with the RTView Builder).

### AT A GLANCE

TIBCO® RTView® BusinessWorks™ Monitor System is an out-of-the-box solution that provides a centralized view of both real-time and historical performance metrics across numerous TIBCO ActiveMatrix BusinessWorks<sup>™</sup> instances and supporting infrastructure.

The product enables you to continually assess and analyze the health and performance of your ActiveMatrix Businessworks environment, gain early warning of issues with historical context, and effectively plan for capacity of your environment. It does so by aggregating and analyzing key performance metrics and presenting the results, in real time, through meaningful dashboards as data is collected for the following elements:

TIBCO ACTIVEMATRIX	TIBCO ACTIVEMATRIX		
BUSINESSWORKS 5	BUSINESSWORKS 6		
<ul> <li>Servers</li> <li>Processes</li> <li>Engines</li> <li>Activities</li> <li>Hosts</li> </ul>	<ul> <li>Applications</li> <li>App Nodes</li> <li>App Slices</li> <li>Processes</li> <li>Hosts</li> </ul>		

TIBCO RTView BusinessWorks Monitor System enables you to dramatically speed the correlation of crucial troubleshooting data for ActiveMatrix BusinessWorks. You can compare real-time performance information across multiple domains and instances within a single view and leverage historical information to provide a centralized view of metrics over specific time intervals. Perhaps most importantly, TIBCO RTView BusinessWorks Monitor System allows you to navigate and drill down through the data to analyze the history behind the metrics associated with the problem.

#### TIBCO RTVIEW BUSINESSWORKS MONITOR SYSTEM ALLOWS YOU TO:

- Centralize views of current and historical performance metrics across numerous domains and ActiveMatrix BusinessWorks environments
- Consolidate monitoring for both ActiveMatrix BusinessWorks versions 5 and 6 within the same monitoring tool
- Effectively plan for capacity of your ActiveMatrix BusinessWorks environment through the use of pre-configured TIBCO Spotfire' reports
- Proactively address performance issues before they happen

### **ATTRIBUTES & CAPABILITIES**

## ADVANCED ACTIVEMATRIX BUSINESSWORKS ALERTING

The RTView alerting system enables you to define default thresholds against an entire deployment of ActiveMatrix BusinessWorks engines. In addition, pre-defined alert rules, screens for changing alert thresholds, and alert event management help you filter and respond to the most critical alerts. Existing TIBCO Hawk<sup>\*</sup> rule bases can also be integrated into the alerting system. TIBCO RTView BusinessWorks Monitor System will also automatically discover new engines and apply alerts for them without requiring any additional configuration.

Summary showing the status and memory consumption of all ActiveMatrix BusinessWorks engines.

## HISTORY

The system's historian stores and manages the aging of important performance data so that analysis can be performed against critical metrics at any time in the past.

## SUPPORT FOR LARGE DEPLOYMENTS

TIBCO RTView BusinessWorks Monitor System can scale extensively, incorporating into a single view the real-time performance of hundreds of Activematrix BusinessWorks engines across geographically dispersed domains. You can further view how the alerting system is performing to ensure scalability of the TIBCO environment.

You can monitor ActiveMatrix BusinessWorks across multiple nodes and performance issues.

#### ENHANCED USER NAVIGATION

The user navigation provides additional metrics, new navigation, and advanced sorts and views that help you better identify potential bottlenecks in your TIBCO environments.
