

RTView® Cloud for IoT

Real-time Visualization for IoT

SL Data Sheet

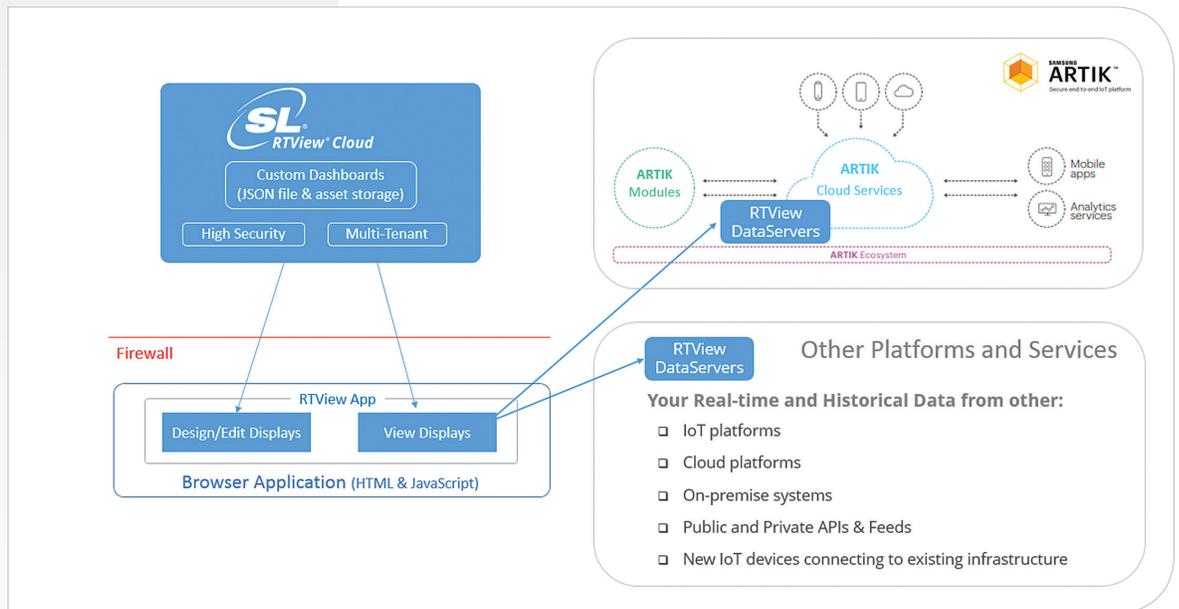

SL is a Samsung ARTIK™ Partner

SL's RTView® Cloud enables users to easily access all the real-time information they need from heterogeneous devices and vendor platforms in one place.

RTView® Cloud

SL's RTView® Cloud platform enables Samsung ARTIK™ customers to visualize ARTIK and non-ARTIK real-time data in beautiful custom dashboards. The data can be combined with other real-time and historical data from multiple systems.

Real-time dashboards are created via simple click-and-drag, with no programming, from any browser, and can be easily embedded into other applications.

About SL

SL is a San Francisco Bay Area-based software company that develops real-time monitoring, visualization and diagnostic software for Global 1000 and mid-market companies whose businesses depend on complex, high-performance applications.

SL is exceptionally proud of its relationships with more than 50 technology and reseller partners and distributors around the globe. Our partners are leaders in Enterprise Software, Financial Services, Industrial Automation, Telecommunications, and Systems Integration.

About Samsung

Samsung ARTIK™ IoT Platform is a secure, end-to-end IoT platform that makes it easier and faster for companies to build, develop, deploy and manage IoT products and services with significantly reduced risk. The ARTIK platform is an integrated-yet-open, enterprise-grade IoT platform that includes end-to-end security, production-ready systems-on-modules, SmartThings Cloud Enterprise, developer resources, and an extensive partner ecosystem.

Samsung Electronics Co., Ltd. shapes the future with transformative ideas and technologies by redefining the worlds of consumer electronics, network systems, memory, and LED solutions. Samsung is driving innovation in the Internet of Things (\$1.2B investment over 4 years) as well as artificial intelligence, machine learning, and autonomous mobility.
