

RTView Deployment Options - Desktop Java Application

Viewer Application

- RTView can be run as a java application by typing
run_viewer.bat
- Licensing scheme is still client-based, i.e., each client machine must register for its own key.
- Viewer can either retrieve data directly or via Data Server

Viewer Application via Java Web Start

- Deployment using Java Web Start is also supported. Jnlp examples can be provided upon request.
- Server-based licensing through JWS is available.
