

Quick Start Guide

Your RTView Sandbox is a place for you to explore RTView Middleware and Enterprise Editions and put them through their paces, so we created this guide to help you minimize the learning curve.

RTView Overview

RTView is an application monitoring platform that provides a middleware-centric view into the health of your most business-critical applications and the software and hardware that support them.

RTView provides the ability to correlate and visualize monitoring data across disparate elements in your infrastructure.

Collectors are used for gathering metrics and data from specific technologies, such as TIBCO EMS, BW, databases, etc.

RTView's Service Model enables users to dynamically associate individual architecture components with a specific business application or service.

Your Sandbox

RTView is packaged in different editions:

- Middleware Edition
- Enterprise Edition

Your RTView Test Drive provides several different sandboxes designed to showcase different RTView editions monitoring different sample environments including:

- TIBCO (Middleware Edition)
- TIBCO (Enterprise Edition)
- Solace (Solace Monitor)
- IBM (Enterprise Edition)
- Oracle (Enterprise Edition)

***** After gaining familiarity with the RTView solution, we can customize it with sample data from other technologies and can even use a collector to send your own data to the sandbox.

RTView Sandbox - Middleware & Enterprise Editions

RTView provides different tabs optimized for different types of users. Now, all your support and operations teams can use the same tool to share the same availability information.

Core Middleware Edition Screens for
Middleware Support Teams

Extended Enterprise Edition Screens for
Application Support Teams

Primary navigation within a tab is to simply click on an element in the primary pane (like a heatmap tile or table row) to drill-down to the next level of detail.

Secondary navigation is shown in the left column and is expandable. Just click to expand to move between screens.

The screenshot shows the RTView Enterprise Edition interface. The top navigation bar includes 'COMPONENTS', 'ALERTS', 'SERVICE TREE', 'SERVICE VIEWS', 'CUSTOM', and 'ADMIN'. The main content area displays a grid of component status tiles. The tiles are organized as follows:

Component	Active / Total	Crit / Warn
TIBCO EMS	14 / 28	0 / 3
TIBCO BusinessWorks 5	23 / 25	6 / 0
TIBCO BW6 & CE	0 / 0	0 / 0
TIBCO ActiveSpaces	41 / 3	0 / 0
TIBCO BusinessEvents	2 / 2	0 / 0
TIBCO Adapters	0 / 0	0 / 0
TIBCO Hawk	0 / 0	0 / 0
Oracle Database	0 / 0	0 / 0
Oracle Weblogic	0 / 0	0 / 0
IBM Websphere	0 / 0	0 / 0
VMWare	2 / 41	0 / 0
JVM	2 / 41	0 / 0
IBM MQ	5 / 5	0 / 0

Click on the icon for more information and resources to support your evaluation.

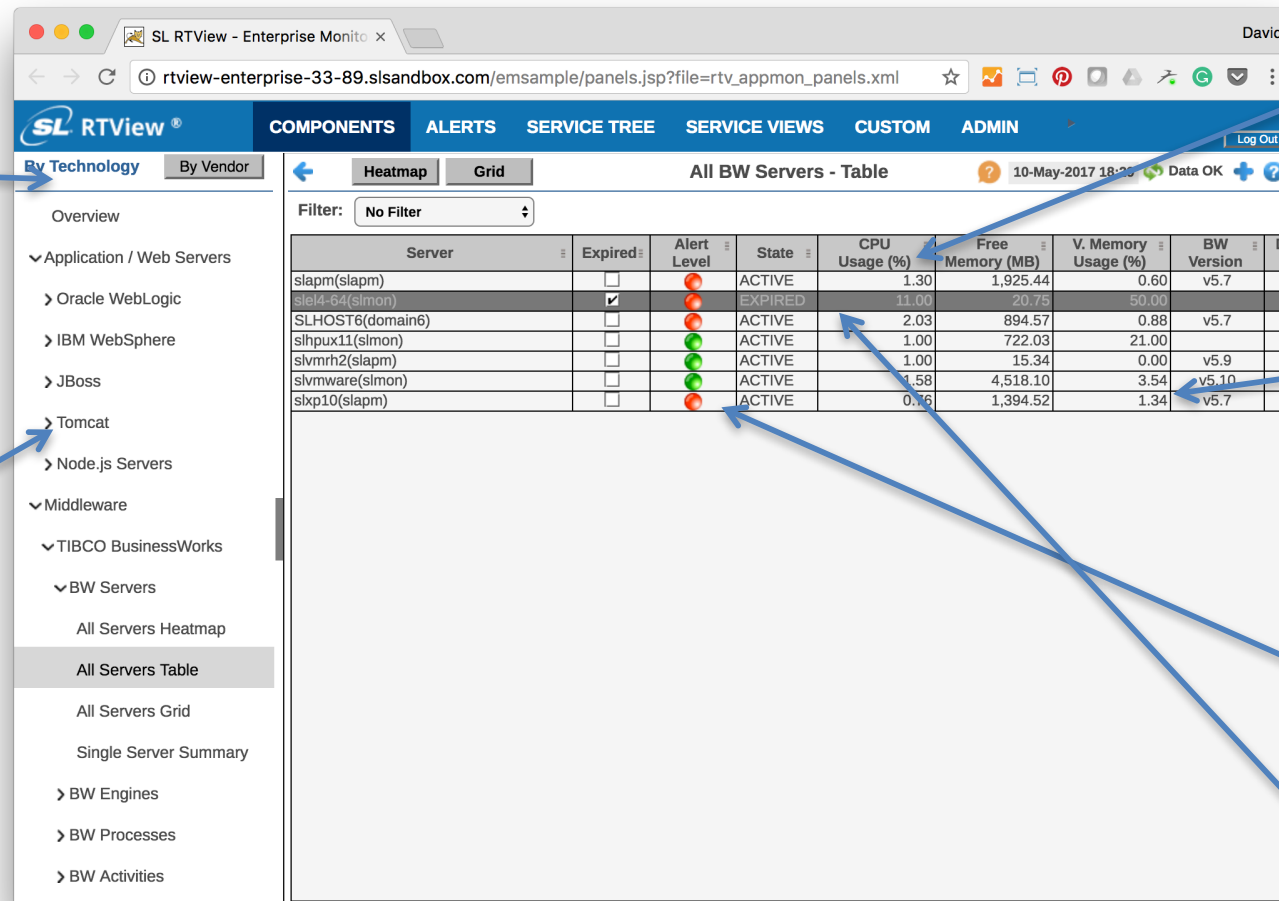

Home screen shows you status of all infrastructure, grouped by component

Components Tab

This tab organizes the monitoring information into an operations or IT-centric view where displays are available for each technology type being monitored.

You can switch between “By Technology” and “By Vendor” views here.

Click any grouping to expand and drill-down

The screenshot shows the SL RTView interface with the Components tab selected. The main view is titled "All BW Servers - Table" and displays a table of server metrics. The table has columns for Server, Expired, Alert Level, State, CPU Usage (%), Free Memory (MB), V. Memory Usage (%), and BW Version. The rows represent different servers, with one row (slxl4-64) highlighted in grey to indicate an expired state. The Alert Level column uses colored circles to indicate the status of each server.

Server	Expired	Alert Level	State	CPU Usage (%)	Free Memory (MB)	V. Memory Usage (%)	BW Version
slapm(slapm)	<input type="checkbox"/>	●	ACTIVE	1.30	1,925.44	0.60	v5.7
slxl4-64(slimon)	<input checked="" type="checkbox"/>	●	EXPIRED	11.00	20.75	50.00	
SLHOST6(domain6)	<input type="checkbox"/>	●	ACTIVE	2.03	894.57	0.88	v5.7
slhpux11(slimon)	<input type="checkbox"/>	●	ACTIVE	1.00	722.03	21.00	
slvmrh2(slapm)	<input type="checkbox"/>	●	ACTIVE	1.00	15.34	0.00	v5.9
slvmware(slimon)	<input type="checkbox"/>	●	ACTIVE	1.58	4,518.10	3.54	v5.10
slxp10(slapm)	<input type="checkbox"/>	●	ACTIVE	0.76	1,394.52	1.34	v5.7

Sort columns by clicking on the column header

Click on any row or component to drill-down further into individual summaries.

Alert level is clearly indicated by color.

Grey row indicates an Expired state.

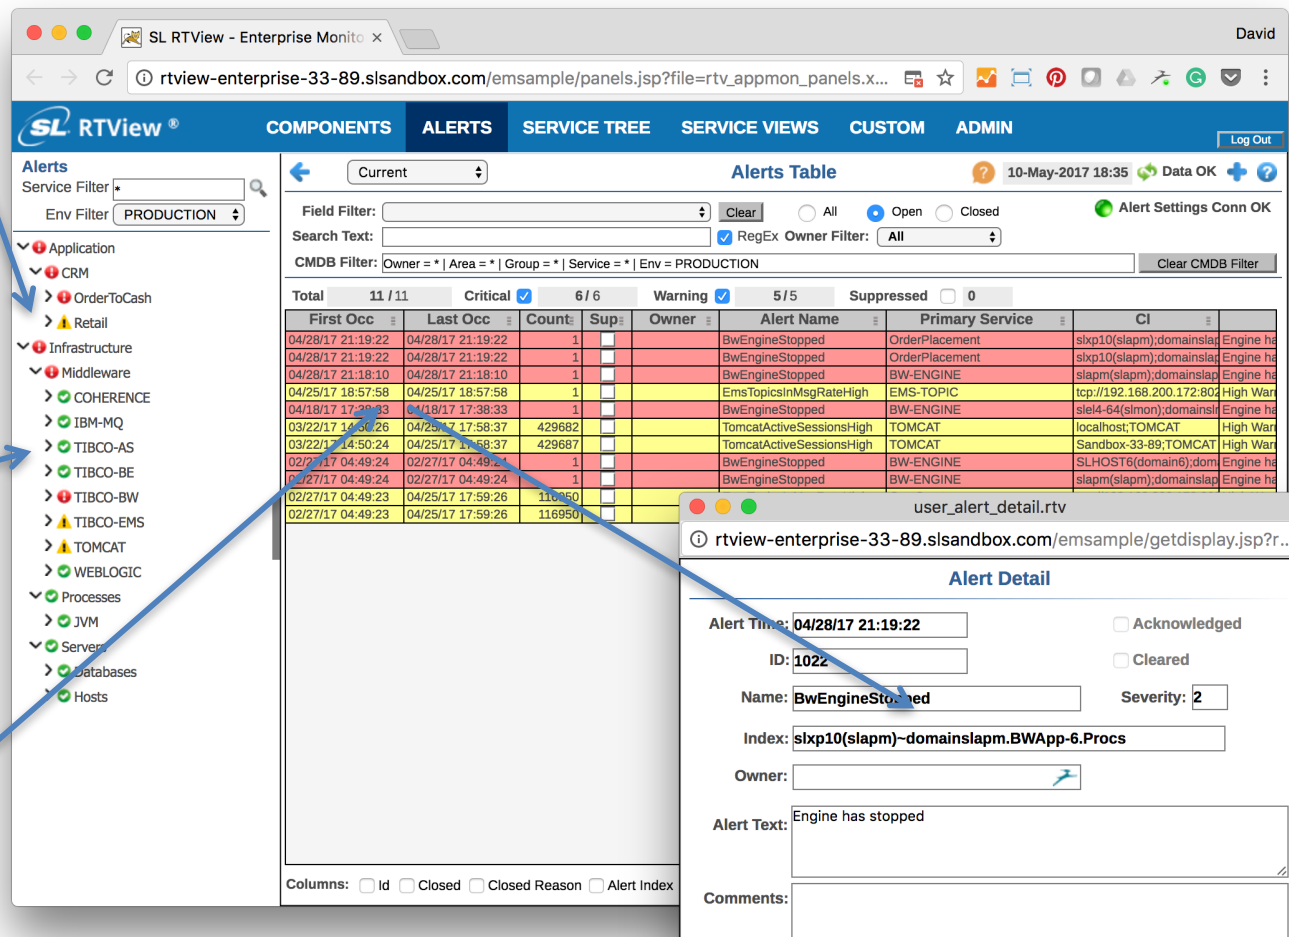

Alerts Tab

Use this display to track and manage all alerts that have occurred in the system. You can add comments, acknowledge or assign Owners to alerts (as an admin)

The color coded navigation tree shows the state of each hierarchical grouping for at-a-glance status.

Choose a node to filter alerts shown in the table.

Double-click on an alert row to get a pop-up with Alert Details

The screenshot displays the SL RTView Alerts Tab interface. The navigation tree on the left is color-coded by status: red for critical, yellow for warning, and green for suppressed. The main table shows a list of alerts with columns for First Occ, Last Occ, Count, Sup, Owner, Alert Name, Primary Service, and CI. A pop-up window titled 'user_alert_detail.rtv' is open, showing details for a specific alert, including Alert Time, ID, Name, Index, Owner, Alert Text, and Comments.

First Occ	Last Occ	Count	Sup	Owner	Alert Name	Primary Service	CI
04/28/17 21:19:22	04/28/17 21:19:22	1			BwEngineStopped	OrderPlacement	sixp10(slapm);domainslap
04/28/17 21:19:22	04/28/17 21:19:22	1			BwEngineStopped	OrderPlacement	sixp10(slapm);domainslap
04/28/17 21:18:10	04/28/17 21:18:10	1			BwEngineStopped	BW-ENGINE	slapm(slapm);domainslap
04/25/17 18:57:58	04/25/17 18:57:58	1			EmsTopicsInMsgRateHigh	EMS-TOPIC	tcp://192.168.200.172:804
04/18/17 17:38:33	04/18/17 17:38:33	1			BwEngineStopped	BW-ENGINE	sle4-64(simon);domainslap
03/22/17 14:50:24	04/25/17 17:58:37	429682			TomcatActiveSessionsHigh	TOMCAT	localhost;TOMCAT
02/27/17 04:49:24	02/27/17 04:49:24	1			BwEngineStopped	BW-ENGINE	Sandbox-33-89;TOMCAT
02/27/17 04:49:24	02/27/17 04:49:24	1			BwEngineStopped	BW-ENGINE	SLHOST6(domain6);dom
02/27/17 04:49:23	04/25/17 17:59:26	116950			BwEngineStopped	BW-ENGINE	slapm(slapm);domainslap
02/27/17 04:49:23	04/25/17 17:59:26	116950			BwEngineStopped	BW-ENGINE	slapm(slapm);domainslap

EXERCISE:
Each row in the table is a different active alert. Select one or more rows, right-click and choose "Alert" from the dialog to see all actions that you can perform on the selected alert.

EXERCISE:
Choose Alert / Set Filter Filed to apply the selected cell data to the to the Filed Filter and Search Text fields.

RTView Sandbox - Middleware & Enterprise Editions

Admin Tab

The Admin Tab can be accessed by administrators of RTView Enterprise Monitor and allows access to modify alert settings, configure service tree options as well as view the current health state of RTView

RTView comes with pre-configured alerts and thresholds to simplify rapid deployment

Each alert level can be configured for individual users who may either want earlier warning of an issue or may want to suppress the number of alerts.

Alert	Warning Level	Alarm Level	Duration	Alert Enabled	Override Count
AcwInstanceCpuHigh	50	75	30	<input type="checkbox"/>	0
AcwInstanceDiskReadBytesHigh	100000	200000	30	<input type="checkbox"/>	0
AcwInstanceDiskReadOpsHigh	100	200	30	<input type="checkbox"/>	0
AcwInstanceDiskWriteBytesHigh	100000	200000	30	<input type="checkbox"/>	0
AcwInstanceDiskWriteOpsHigh	100	200	30	<input type="checkbox"/>	0
AcwInstanceNetworkReadBytesHigh	100000	200000	30	<input type="checkbox"/>	0
AcwInstanceNetworkWriteBytesHigh	100000	200000	30	<input type="checkbox"/>	0
BwActivityErrorRateHigh	50	80	30	<input type="checkbox"/>	0
BwActivityExecutionTimeHigh	200	400	30	<input type="checkbox"/>	0
BwEngineCpuUsedHigh	50	80	30	<input type="checkbox"/>	0
BwEngineMemUsedHigh	50	80	30	<input type="checkbox"/>	0
BwEngineStopped	NaN	NaN	30	<input checked="" type="checkbox"/>	0
BwProcessAbortRateHigh	50	80	30	<input type="checkbox"/>	0
BwProcessAvgElapsedTimeHigh	30000	50000	30	<input type="checkbox"/>	0
BwProcessAvgExecutionTimeHigh	300000	500000	30	<input type="checkbox"/>	0
BwProcessCreatedRateHigh	100	200	30	<input type="checkbox"/>	0
BwProcessCreatedRateLow	2	0	30	<input type="checkbox"/>	0
BwProcessElapsedTimeHigh	100	200	30	<input type="checkbox"/>	0
BwProcessExecutionTimeHigh	50	80	30	<input type="checkbox"/>	0
BwProcessSuspendRateHigh	50	80	30	<input type="checkbox"/>	0

Settings for Selected Alert

Name: **BwEngineMemUsedHigh** Warning Level: 50.0 Duration (Secs.): 30

Description: **BW Engine memory usage exceeded limit** Alarm Level: 80.0 Enabled:

Tabular Alert Options
The Warning Level, Alert Level and Alarm Enabled values on this screen can be overridden for each alert index.

Save Settings Override Settings

The user and role management may restrict access to these screens.

Alert thresholds are preconfigured globally so you don't have to set for each instance.

Alerts can also be set for individual servers using the Override feature.

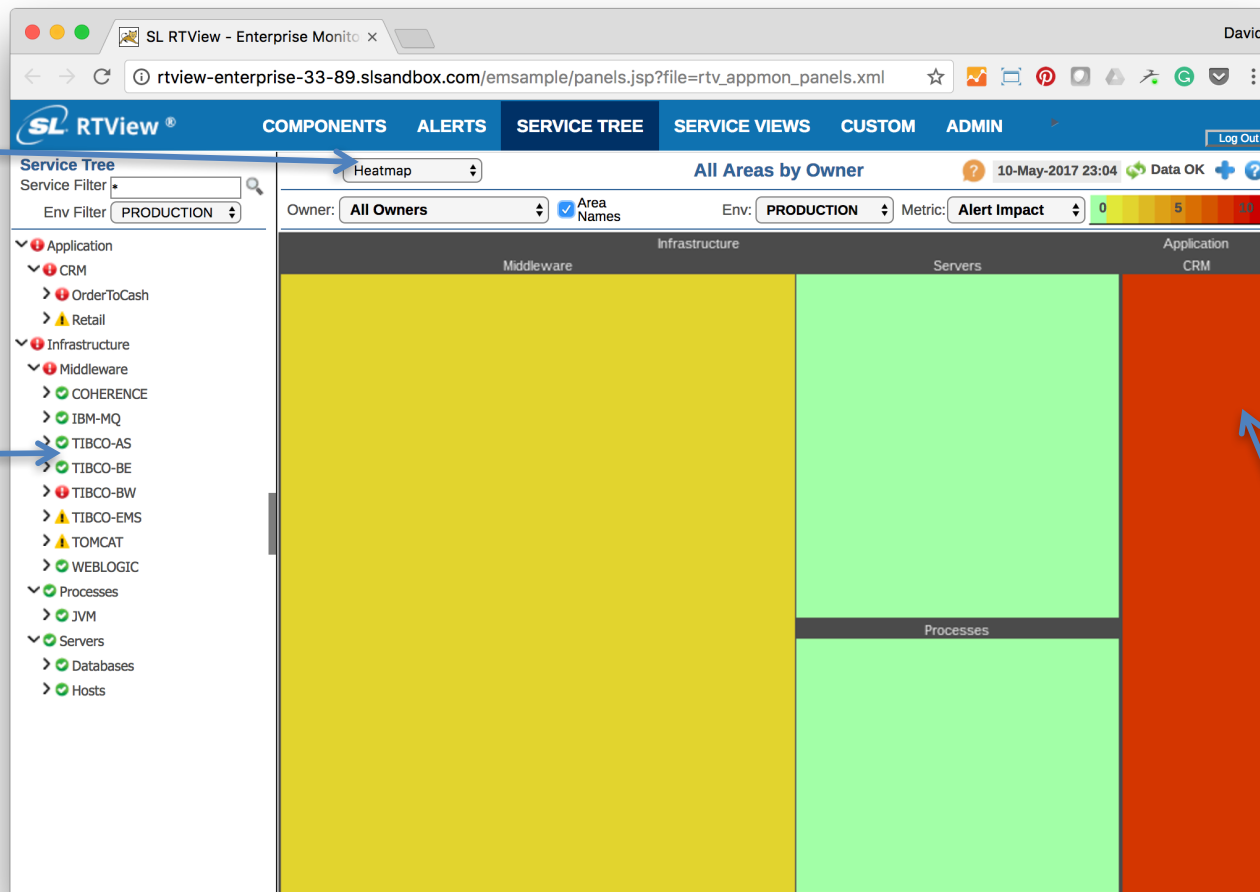

Service Tree Tab

The Service Tree view is the most expansive – offering color-coded alert status all all levels for Applications, Infrastructure and Middleware. Application support teams can easily identify when applications are experiencing alert conditions and drill-down into successive layers of detail.

Toggle between heatmaps, tables and other default visualizations.

Click any grouping to expand and drill-down

This screen is the one-stop shop for high-level visibility for everything in the application path.

Understand the criticality of an alert based on the potential impact to the business

Mouse-over heatmap to see details on Applications, Infrastructure and Middleware.

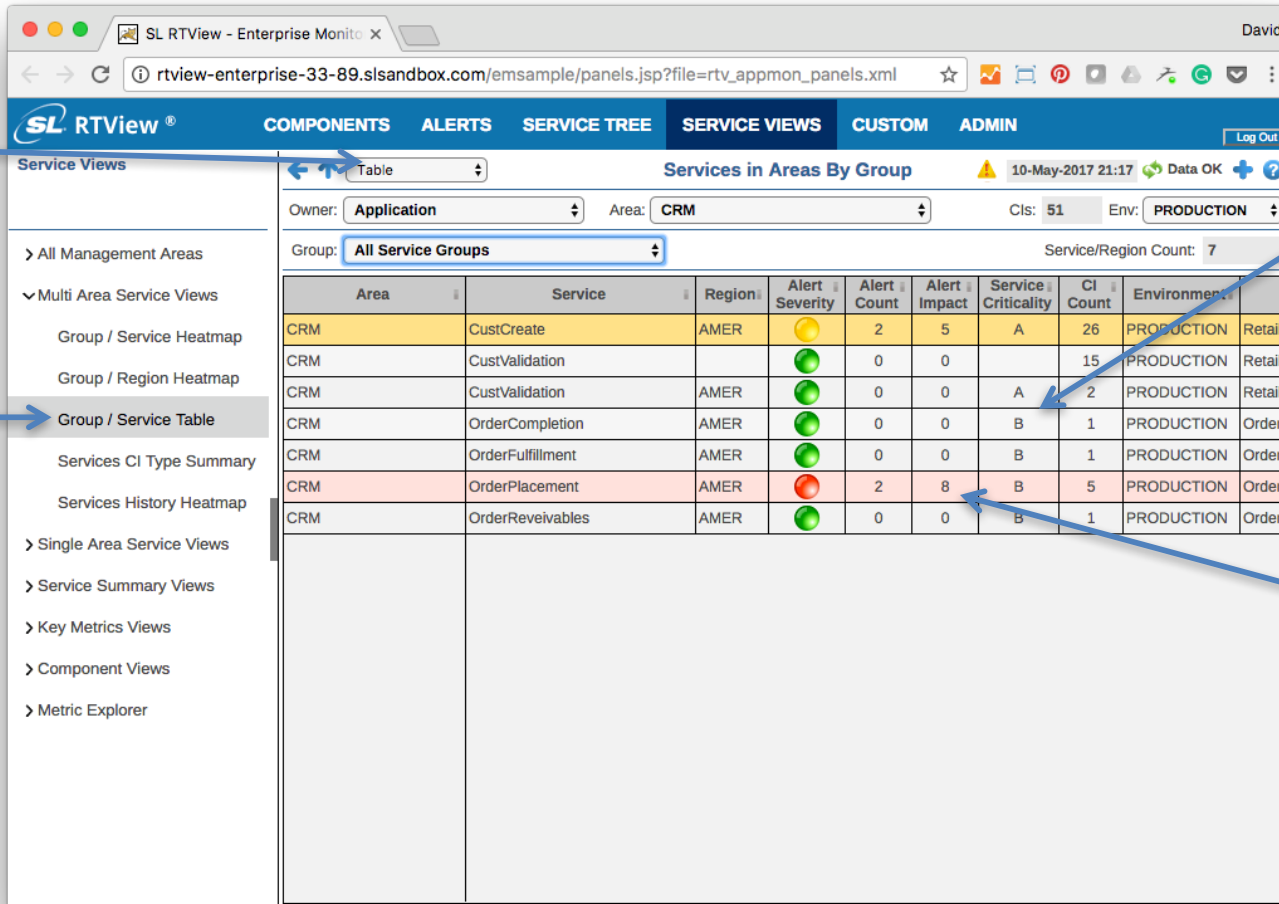

Click to drill-down into successive layers of further detail.

Service Views Tab

The table lists all of the Components (Cis) used in the Service or Application. This makes it much easier for an application support team to proactively identify the specific technology that could affect the performance of the service or application.

Toggle between heatmaps, tables and other default visualizations.

Click any grouping to expand and drill-down

Area	Service	Region	Alert Severity	Alert Count	Alert Impact	Service Criticality	CI Count	Environment	
CRM	CustCreate	AMER	Yellow	2	5	A	26	PRODUCTION	Retail
CRM	CustValidation		Green	0	0		15	PRODUCTION	Retail
CRM	CustValidation	AMER	Green	0	0	A	2	PRODUCTION	Retail
CRM	OrderCompletion	AMER	Green	0	0	B	1	PRODUCTION	Order
CRM	OrderFulfillment	AMER	Green	0	0	B	1	PRODUCTION	Order
CRM	OrderPlacement	AMER	Red	2	8	B	5	PRODUCTION	Order
CRM	OrderReveivables	AMER	Green	0	0	B	1	PRODUCTION	Order

Understand the criticality of an alert based on the potential impact to the business

View Service metrics (Impact, Severity, Count and Criticality, and CI Count) for one or all Areas, Owners, Groups and Environments, and compare detailed metrics across all Areas in your organization.
